

**CUSTOM DESIGNED BACKUP
& RECOVERY...FOR
PROTECTION THROUGH THE
UNFORESEEN**

**It's no longer a matter of if, but when,
an event will occur that creates
downtime for your organization. Will
you prevail?**

**At OneIT, we create IT environments that
let our clients sleep better at night.**

Data Vault™

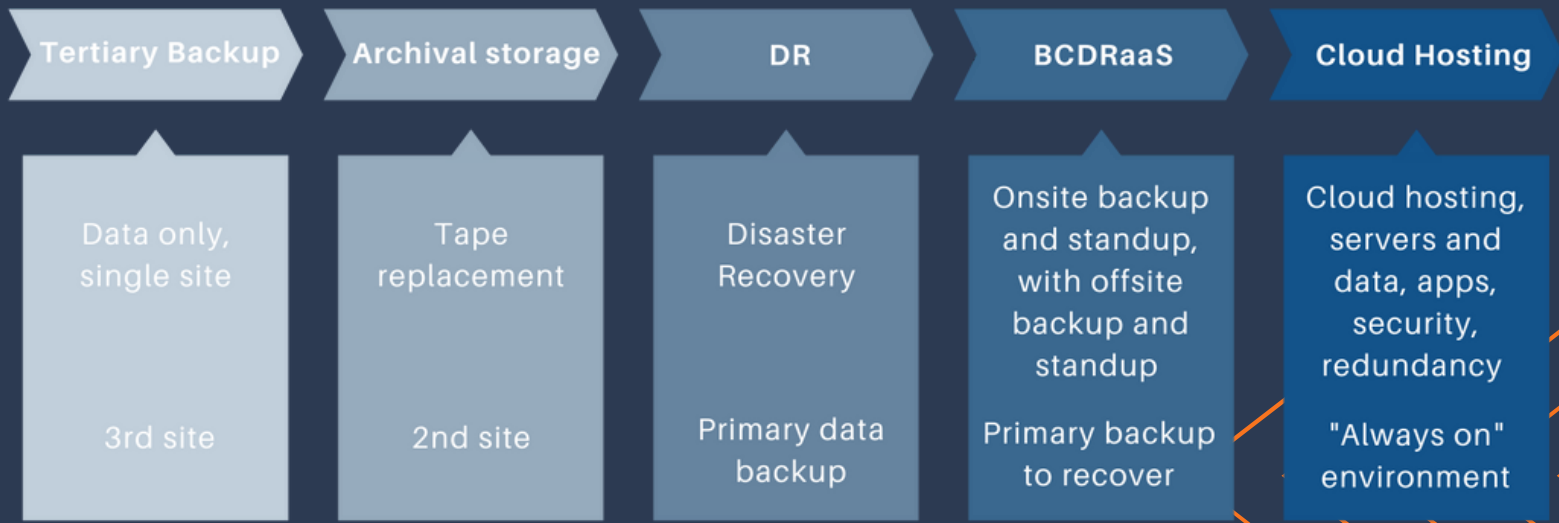

OneIT®

DataVault™ is a highly customized BCDRaaS and data backup solution developed to meet the specific, yet varying, requirements of any organization. On premise, off premise, and tertiary sites combine to offer unprecedented customization, usability and uptime.

At OneIT, we view data backup differently. Why simply backup data, when you can backup AND recover? We view uptime as paramount, and create environments for our customers that recover their data and keep IT environments running thru any circumstance.

PROGRESSION OF SOLUTIONS

With **DataVault**, customers choose the exact features of the BCDR environment they would like to create. Then OnelT designs, deploys, and manages it. We strive to hit each customer's sweet spot, where budget and risk meet, creating an environment that fits both perfectly.

Customization options include:

Number of Sites	Recovery	Servers & Apps	Retention	Security
<ul style="list-style-type: none"> • On premise • Off premise • Cloud • Hybrid • Tertiary cloud 	<ul style="list-style-type: none"> • Data only • Ability to stand up • Customized per site 	<ul style="list-style-type: none"> • All • Some • Treat servers/apps differently per site 	<ul style="list-style-type: none"> • Custom RPO • Custom RTO • Near zero data loss 	<p>OnelT builds to nearly any compliance criteria required</p>

After a complimentary assessment is performed, and the above selected criteria are applied, OnelT designs a one-of-a-kind environment that meets the specific needs of the client, right down to the storage amounts, CPU and RAM required. No solution is “off the shelf,” nor do clients pay for extra storage or compute quantities that are unneeded.

Advantages of using DataVault

DataVault was developed with ease of use and transparency in mind. It's a fully managed solution, however clients always have access to their data, and there are never any access fees.

OneIT performs all of the uplift of our client's environment into our BCDR solutions, as well as provide complimentary training. It's true white-glove service that other providers don't offer.

No capital investment is required; **DataVault** works with most existing environments, whether virtual or physical.

DataVault is an ideal replacement for legacy tape backup systems and processes.

OneIT's cloud is located in Tier III and Tier IV carrier hotels, with access to over 130+ telecom carriers. With so many choices, clients can ensure their connectivity into their BCDR environment is as robust and inexpensive as possible.
